

MINIMESS Xtreme® Pressure

The innovative solution

Product highlights

- > Operating pressure up to 1,000 bar
- > Connection of hoses or measuring equipment such as sensors and pressure gauges
- > Sampling and venting
- > Coupling by hand and without system downtime - up to 700 bar
- > For oil or gas applications
- > Use with hydrogen possible (with reduced pressure range)

You work with hydraulic pressures of up to 1,000 bar and are looking for an interface that allows you to safely connect measurement technology and hoses.

Typical areas of application are:

- > Shipbuilding
- > Oil & gas applications
- > Rescue cutters & spreaders
- > Test stand operation
- > High pressure pumps

Minimess Xtreme® Pressure

The further development of the proven Minimess® test point, with special design for high pressure applications, covers exactly these requirements.

A wide variety of analysis and maintenance tasks can be realized without any plant downtime.

Qualification of further pressure stages possible on request - further information in data sheet

Type	Order Number	Process Connection	Sealing type
Test point	MTP7-CMK1-D1F1	9/16-18 UNF	58° Sealing cone
Test point	MTP7-CMK1-F2F1	ISO228-G1/4	Form F / ISO 1179-2
Adaptor for pressure sensors	MAA7-CVU1-F1M1	ISO228-G1/4	Form F / ISO 1179-2
Adaptor for hoses	MAA7-CVU1-D1M1	9/16-18 UNF	60° Sealing cone
