Long life IR sensor
Highly reliable
Low maintenance costs

# F-Gas

Refrigerant Gas and SF<sub>6</sub> Detector

The Crowcon F-Gas detector is a high quality infrared (IR) fixed-point detector that delivers dependable detection of freon gases. Available for detecting a range of different refrigerant gases and also sulphur hexafluoride (SF<sub>6</sub>), the Crowcon F-Gas detector can be connected to any control system that accepts an analogue signal.

Housed within an IP54 rugged enclosure, the F-Gas detector is suitable for use in non-hazardous areas such as plant rooms or switchgear rooms. In addition to protecting personnel from toxic gas risks, installing the F-Gas detector also helps to reduce the risk of leakage of powerful 'greenhouse gases' into the environment.

#### Refrigerant gas options

### Blended fluids used in refrigeration/ air conditioning market:

| Refrigerant | Components     | Measuring range |
|-------------|----------------|-----------------|
| R404a       | R143a/125/134a | 1000 ppm        |
| R407a       | R32/125/134a   | 1000 ppm        |
| R407c       | R32/125/134a   | 1000 ppm        |
| R410a       | R32/125        | 1000 ppm        |
| R507        | R143a/125      | 1000 ppm        |

#### Pure fluids

| Fluids           | Formula                           | Name                               | Measuring range |
|------------------|-----------------------------------|------------------------------------|-----------------|
| HCFC 22 (R22)    | CHCIF <sub>2</sub>                | Chlorodifluoromethane              | 1000 ppm        |
| HCFC 123 (R123)  | CHCI <sub>2</sub> CF <sub>3</sub> | 2,2-Dichloro-1,1,1-trifluoroethane | 1000 ppm        |
| HFC 125 (R125)   | C <sub>2</sub> HF <sub>5</sub>    | Pentafluoroethane                  | 1000 ppm        |
| HFC 134a (R134a) | CH <sub>2</sub> FCF <sub>3</sub>  | 1,1,1,2-Tetrafluoroethane          | 1000 ppm        |

# Special fluidity used for vehicle refrigeration

| Fluid   | Formula                            | Name              | Measuring range |
|---------|------------------------------------|-------------------|-----------------|
| R1234yf | CH <sub>2</sub> =CFCF <sub>3</sub> | Tetrafluropropene | 1000 ppm        |

#### Insulating gas

| Gas             | Name                 | Measuring range |
|-----------------|----------------------|-----------------|
| SF <sub>6</sub> | Sulphur hexaflouride | 1000 ppm        |

Superior IR sensor technology

Provides fast, stable and dependable performance with low maintenance and long life. Unlike cheaper semi-conductor type sensors the F-Gas detector is not affected by other types of gas or changes in temperature or humidity.

### Simple and veresatile

| LED indicators           | Tri-coloured LED's indicate the operating status of the detector, and in combination with the function keys, facilitate simple adjustments such as zero and calibration. |
|--------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Choice of output signals | The analogue output signal can be set as 4-20mA, 0-20mA, 0-2V, 0-5V or 0-10Vdc for compatibility with virtually any control system.                                      |

# Long life with low maintenance costs

| No consumable parts  | Provides many years of service with no requirement to replace the sensor or any other components.   |  |
|----------------------|-----------------------------------------------------------------------------------------------------|--|
| Simple to test       | Requires a bi-annual gas check only. Re-calibration is only necessary if readings are out of range. |  |
| IP54 rated enclosure | Provides good protection from dust and water ingress in indoor environments.                        |  |

# Safety and compliance

| F-Gas regulations compatible | Enables F-Gas suppliers and users to comply with the mandatory European F-Gas regulations.                                      |
|------------------------------|---------------------------------------------------------------------------------------------------------------------------------|
| Rapid gas leak detection     | Provides an early warning that gas is leaking and thus maintains system efficiency and reduces expensive gas replacement costs. |
| Environmental protection     | Helps to reduce the risk of leakage of powerful 'greenhouse gases' into the environment.                                        |

#### Specification

| Size                  | 151 x 80 x 60mm (5.9 x 3.1 x 2.4ins) (Total size with cable gland: 151mm x 102mm x 60mm) |
|-----------------------|------------------------------------------------------------------------------------------|
| Weight                | 0.25kg (8.8oz)                                                                           |
| Ingress protection    | IP54                                                                                     |
| Measuring principle   | Non-dispersive infrared (NDIR)                                                           |
| Range                 | 0-1000ppm                                                                                |
| Resolution            | 1 ppm                                                                                    |
| Power                 | 12-28Vdc                                                                                 |
| Analogue output       | 4-20mA current source (can be set to 0-20mA, 0-2V, 0-5V or 0-10V)                        |
| Operating temperature | -20 to +40°C                                                                             |
| Humidity              | 0-95% RH non-condensing                                                                  |
| Repeatability         | +/- 1% FSD                                                                               |
| Linearity             | +/- 2% FSD                                                                               |
| Start up time         | <120 seconds                                                                             |
| Response time         | 30 seconds approximately                                                                 |
| Pressure              | 800-1200mBar                                                                             |
| Approvals             | EMC: EN50270                                                                             |
