

Crane scale KERN HFM

Robust industrial crane scale with bright LED display for optimum reading in unfavourable ambient conditions

Features

- With the TÜV certification mark, the scales meet the requirements of the standard EN 13155 (Non-fixed load lifting attachments/ Breakage resistance) and EN 61010-1 (Electrical safety)
- Professional device for robust applications in production, quality control, logistics etc. Because of its stable construction and robust design, it is ideal for continuous use in industrial environment
- High mobility: thanks to rechargeable battery operation, compact, lightweight construction, it is suitable for the use in several locations (production, warehouse, dispatch department etc.)

- Adaptation to unstable environmental conditions by changing the readability
- Hold function: When the weighing value remains unchanged the weight indicated on the display is automatically "frozen" until the Hold key is pressed
- Tare: Resets the display to "0" when there is a load on the scale. Now removed or added loads are directly displayed
- Hook with safety catch, revolving
- Radio remote control standard. Range up to 20 m. All functions can be selected (excl. ON/OFF). W×D×H 48×10×95 mm. Batteries included, 2×1.5 V AAA

Technical data

- Superior display size: digit height 30 mm, bright with high contrast for easy reading of weighing results, even in poor lighting conditions
- Internal rechargeable battery pack, operating time up to 50 h without backlight, charging time approx. 14 h
- Precision: 0,2 % of [Max]
- Permissible ambient temperature 0 °C/40 °C

Internal adjusting: Quick setting up of the balance's accuracy with

Adjusting program CAL:

For quick setting up of the balance's accuracy. External adjusting weight required

internal adjusting weight (motordriven)

Easy Touch: Suitable for the connection, data transmission and control through PC, tablet or smartphone.

MEMORY

Balance memory capacity, e.g. for article data, weighing data, tare weights, PLU etc.

Alibi memory:

Memory:

Secure, electronic archiving of weighing results, complying with the 2014/31/EU standard

Data interface RS-232:

• 6550.• To connect the balance to a printer, PC or RS 232 network

RS-485 data interface:

To connect the balance to a printer, PC or other peripherals. Suitable for data transfer over large distances. Network in bus topology is possible

USB data interface:

To connect the balance to a printer, PC or other peripherals

Bluetooth* data interface:

To transfer data from the balance to a printer, PC or other peripherals

*

WiFi data interface:

To transfer data from the balance to a printer, PC or other peripherals

Control outputs (optocoupler, digital I/O): To connect relays, signal lamps, valves, etc.

Analogue interface:

to connect a suitable peripheral device for analogue processing of the measurements

Interface for second balance:

For direct connection of a second balance

balance calibration.

Range of services:

characteristics) for test weights

· Calibration of force-measuring devices

ment in Europe

Network interface:

For connecting the scale to an Ethernet network

KERN – Precision is our business

PROTOCOL

KERN Communication Protocol (KCP): KCP

It is a standardized interface command set for KERN balances and other instruments, which allows retrieving and controlling all relevant parameters and functions of the device. KERN devices featuring KCP are thus easily integrated with computers, industrial controllers and other digital systems

GLP/ISO log: GLP

GLP/ISO log:

With weight, date and time. Only with KERN PRINTER printers

Piece counting:

Reference quantities selectable. Display can PCS be switched from piece to weight

Recipe level A:

Recipe level B:

Internal memory for complete recipes with name and target value of the recipe ingredients. User guidance through display

Totalising level A:

- 88' The weights of similar items can be added SUM together and the total can be printed out

Percentage determination:

Determining the deviation in % from the target value (100 %)

Weighing units:

to KERN's website for more details

Weighing with tolerance range: (Checkweighing) Upper and lower limiting can

Hold function: ^-

Protection against dust and water splashes IPxx:

The type of protection is shown in the pictogram

To ensure the high precision of your balance KERN offers you the the appropriate test

weight in the international OIML error limit classes E1-M3 from 1 mg - 2500 kg. In combination with a DAkkS calibration certificate the best pre-requisite for proper

The KERN DAkkS calibration laboratory today is one of the most modern and bestequipped DAkkS calibration laboratories for balances, test weights and force-measure-

Thanks to the high level of automation, we can carry out DAkkS calibration of balances, test weights and force-measuring devices 24 hours a day, 7 days a week.

· Volume determination and measuring of magnetic susceptibility (magnetic

· Conformity evaluation and reverification of balances and test weights

· Database supported management of checking equipment and reminder service

· DAkkS calibration certificates in the following languages DE, EN, FR, IT, ES, NL, PL

· DAkkS calibration of balances with a maximum load of up to 50 t

· DAkkS calibration of weights in the range of 1 mg - 2500 kg

UNDER

Ready for battery operation. The battery type is specified for each device

Load support with hook on the underside of

Rechargeable set

Universal mains adapter:

with universal input and optional input socket MULTI adapters for A) EU, CH, GB; B) EU, CH, GB, USA; C) EU, CH, GB, USA, AUS

230V/50Hz in standard version for EU, CH.

On request GB, USA or AUS version available

Mains adapter:

Integrated in balance. 230V/50Hz standard EU. More standards e.g. GB, USA or AUS on request

Weighing principle: Strain gauges:

Electrical resistor on an elastic deforming body

Weighing principle: Tuning fork:

A resonating body is electromagnetically excited, causing it to oscillate

Weighing principle: Electromagnetic force compensation:

Coil inside a permanent magnet. For the most accurate weighings

Weighing principle: Single cell technology: Advanced version of the force compensation
