

PT4654XL

REPEATABLE, RELIABLE
PRESSURE MEASUREMENTS

Description

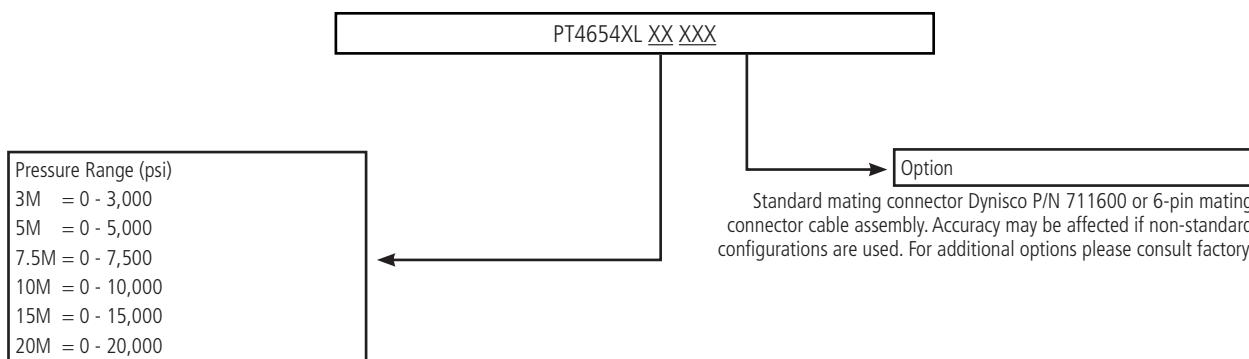

The Dynisco PT4654XL Series transmitter is a $\pm 0.5\%$ sensor ideal for injection molding machine nozzles or hot runners to measure polymer melt pressure. The PT4654XL transmitter provides the industry standard 4 - 20 mA amplified signal to data acquisition or SPC/SQC programs. The PT4654XL comes equipped with adjustable zero and span pots. The PT4654XL features a 1/2-20 UNF jam nut for simple and easy installation in space restricted areas. The transmitter can be supplied in a variety of lengths to meet the requirements of the application.
