

IsoPAQ-21L/-22L

1- & 2-channel Loop Powered Isolators for 0(4)-20 mA Signals with High Isolation and Protective Separation

IsoPAQ-21L and IsoPAQ-22L are 1- and 2-channel loop powered isolators used for electrical isolation of 0(4)-20 mA signals to avoid measurement errors due to different voltage potentials or ground loops in an instrument installation.

The isolators need no power supply, which contributes to reduced installation costs compared to isolation transmitters.

The high isolation level of 4 kV provides an effective protection for downstream devices.

The 2-channel version, IsoPAQ-22L offers a very cost effective alternative combined with a high-density mounting.

The high reliability and the Protective Separation are additional features that ensure a safe system operation.

- Input to output galvanic isolation Protection against erroneous measurements due to parasitic voltages or ground loops
- 1- and 2-channel versions Allows for optimal cost efficiency

•

•

- No power supply required Reduced wiring saves installation costs
- **Low voltage drop** Input voltage drop of less than 2 V reduces impact on the primary current loop
- **Protective Separation acc. to EN 61140** The design and high isolation level (4 kV) provides protection for service personnel and downstream devices against impermissibly high voltage
- **High accuracy** Negligible additional measurement errors in the loop
 - High-density DIN-rail mounting 12.5 mm (0.5") housing combined with very low self heating allows for high density mounting
- Plug-in screw terminals

Simplifies installation and maintenance

Specifications: IsoPAQ-21L/-22L

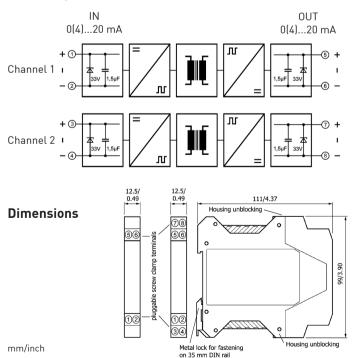

Input			
Input signal	0(4)-20 mA / max. 30 V		
Operating current	< 20 μΑ		
Voltage drop	< 2 V		
Overload	≤ 100 mA, ≤ 30 V		
Output			
Output signal	0(4)-20 mA / max. 28 V		
Response time	2 ms @ 250 Ω load / 6 ms @ 750 Ω load		
(10 to 90 % of end value)			
Ripple	< 0.07 % of measured value, ~100 kHz		
General data			
Transmission error	± 0.1 % of end value		
Load error	\pm 0.03 % of measured value / 100 Ω load		
Temperature coefficient ¹⁾	\pm 0.0015 %/K of measured value / 100 Ω load		
Test voltage	4 kV, 50 Hz Between all circuits		
Working voltage ^{2]} (Basic Insulation)	600 VAC/DC for overvoltage category II and pollution degree 2		
	acc. to EN 61010 part 1 between all circuits.		
Protection against electrical	Protective separation acc. to EN 61140 by reinforced insulation acc. to EN 61010 part 1		
shock ²⁾	up to 300 VAC/DC for overvoltage category II and pollution degree 2 between all circuits.		
Ambient temperature	Operation -20 to +70 °C (-4 to +158 °F)		
	Transport and storage -35 to +85 °C (-31 to +185 °F)		
EMC ^{3]}	EN 61326-1		
Construction	12.5 mm (0.5") housing, protection class: IP20		
Connection	≤ 2.5 mm², AWG 14		
Weight	Арргох. 100 д		

1) Average TC in specified operating temperature range

2) As far as relevant the standards and rules mentioned above are considered by development and production of our devices. In addition relevant assembly rules are to be considered by installation of our devices in other equipments. For applications with high working voltages, take measures to prevent accidental contact and make sure that there is sufficient distance or insulation between adjacent situated devices.

3) Minor deviations possible during interference
