

Hand-held multifunction calibrator Models Pascal 100, Pascal 100/IS

WIKA data sheet CT 18.01

for further approvals
see page 3 - 4

Applications

- Calibration service companies and service industry
- Measurement and control laboratories
- Quality assurance

Special features

- Measurement and simulation of the following parameters: pressure, electrical signals (mA, mV, V, Ω), temperature (TC, RTD), frequency and pulse
- Large colour display with touchscreen with new intuitive and user-friendly interface
- Internal pressure/vacuum generation
- Option: intrinsically safe version II 2G Ex ib IIC T4 Gb - Tamb: -10 ... +50 °C
- Option: integrated HART® module for communication with HART® instruments

Hand-held multifunction calibrator, model Pascal 100

Description

General

Due to its versatility the hand-held multifunction calibrator Pascal series is ideally suited for on-field testing and calibration of industrial measuring instruments. The typical application is the calibration of pressure transmitters, temperature transmitters, pressure gauges, temperature probes and other measuring instruments. The calibration data are stored in the instrument's memory. The communication with a PC is used to remotely control the unit and to download the calibration reports.

The Pascal 100 is the most advanced portable multifunction calibrator for the measurement and simulation of the following parameters: relative and absolute pressure, electrical signals (mA, mV, V, Ω), temperature (TC, RTD), frequency and pulse. In addition, there is the possibility to include an optional HART® module which allows communication with HART® instruments.

Features

The calibrator Pascal 100 has a new large touchscreen display with a new intuitive user-friendly interface, that allows an easy and fast configuration of the calibrator. The availability of ATEX approval II 2G Ex ib IIC T4 Gb Tamb: -10 ... +50 °C expands the possible applications of this calibrator into hazardous areas (only for Pascal 100/IS). Even in the ATEX version the DC 24 V voltage supply for external transmitters is available.

The calibrator has four measurement channels and is thus capable to carry out up to four simultaneous measures. For more flexibility on on-field calibrations, the Pascal 100 has an on-board memory for data storage that allows the evaluation of logged measuring values and calibration reports. In laboratory applications the real-time communication allows the remote control of the Pascal 100 from a PC.

The Pascal 100 can be modularly configured with up to two input and two output modules as well as one HART® module and one output module, which are galvanically isolated from each other. The measurement/simulation of the electrical signals or temperature as well as up to six pressure sensors (four internal and two external sensors) enables the operator to configure the calibrator according to his specific requirements.

The environmental parameters module (option) is another plus of Pascal 100, it allows the monitoring of the barometric pressure, the ambient temperature and the relative humidity. The values will be stored in the calibration report.

Pressure

The Pascal 100 has an integrated pressure/vacuum generation by means of a built in hand pump from

-0.9 ... +21 bar (-13 ... +300 psi). The presence of a fine precision regulator allows the operator to adjust small pressure increments.

Many different pressure configurations are available, e.g.:

- in combination with internal pressure sensors that can be connected to the internal pump (up to 21 bar / 300 psi)
- in combination with external pressure sensors that can be connected directly to the external plugs.

Low pressure internal sensors are protected against overpressure by means of protection valves. High flexibility in measurement is given by the availability of multiple pressure engineering units.

Specifications

Models Pascal 100 and Pascal 100/IS

| Base instrument | |
|----------------------------------------------|--------------------------------------------------------------------------------------------------|
| Indication | |
| Display | Touchscreen + 5 keys |
| Dimensions | 640 x 480 Dots Dot size: 0.06 x 0.06 mm (0.002 x 0.002 in) |
| Backlight | LED |
| Electrical input and output | |
| Number and type | banana-plug inputs for electrical parameters, resistance thermometers and thermocouples |
| Resistance thermometer (RTD) | Pt100 (385, 3616, 3906, 3926, 3923), Pt200, Pt500, Pt1000 (385, 3916), Ni100, Ni120, Cu10, Cu100 |
| Thermocouples | Types J, K, T, F, R, S, B, U, L, N, E, C |
| Voltage signal | input: DC \pm 100 mV, \pm 2 V, \pm 80 V output: DC 20 V |
| Current signal | input: DC \pm 100 mA output: DC 20 mA |
| Frequency signal | 0 ... 50,000 Hz |
| Pulses signal | 1 ... 999,999 |
| Resistance | 0 ... 10,000 Ω |
| Voltage supply | DC 24 V |
| HART® communication | |
| HART® module | based on HART® universal and common practice commands |
| Resistance | HART® resistance 250 Ω (activatable) |
| Loop current | max. DC 24 mA |
| Voltage supply | DC 24 V |
| Pressure connection | 1/8 BSP (female) |
| Permissible media | clean, dry, non-corrosive gases |
| Temperature compensation | -10 ... +50 °C (14 ... 122 °F) |
| Temperature coefficient | 0.001 % of reading/°C, outside of 19 ... 23 °C (66 ... 73 °F) |

Base instrument

| | |
|---------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Units | bar, mbar, psi, psf, Pa, hPa, kPa, MPa, torr, atm, kg/cm ² , kg/m ² , mmHg (0 °C), cmHg (0 °C), mHg (0 °C), inHg (0 °C), mmH ₂ O (4 °C), cmH ₂ O (4 °C), mH ₂ O (4 °C), inH ₂ O (4 °C), ftH ₂ O (4 °C) |
| Voltage supply | |
| Battery type | rechargeable battery NiMH |
| Battery life (fully-charged) | 8 hours for typical usage |
| Power supply | AC 100 ... 240 V, 50/60 Hz |
| Permissible ambient conditions | |
| Operating temperature | -10 ... +50 °C (14 ... 122 °F) |
| Storage temperature | -30 ... +80 °C (-22 ... +176 °F) |
| Relative humidity | Operating humidity: 10 ... 90 % r. h. (non-condensing) Storage humidity: 0 ... 90 % r. h. (non-condensing) |

Case

| | |
|---------------------------|---------------------------------------|
| Material | Front panel aluminium |
| Ingress protection | IP54 |
| Dimensions | 330 x 270 x 170 mm (13 x 10.6 x 7 in) |
| Weight | 6 kg (13 lbs 2 oz) |

Ignition protection type for model Pascal 100/IS

| | |
|-------------------------------------|----------------------------------------------------|
| ATEX directive | II 2G Ex ib IIC T4 Gb - T_{amb} : -10 ... +50 °C |
| Connection values | |
| Max. voltage | $U_0 = 29.7 \text{ V}$ |
| Max. current | $I_0 = 31 \text{ mA}$ |
| Max. power | $P_0 = 0.92 \text{ W}$ |
| Max. effective internal capacitance | $C_0 = 69 \text{ nF}$ |
| Max. effective internal inductance | $L_0 = 30 \text{ mH}$ |
| Power supply circuit | |
| Max. voltage | $U_i = 30 \text{ V}$ |
| Max. current | $I_i = 100 \text{ mA}$ |
| Max. power | $P_i = 0.75 \text{ W}$ |
| Max. effective internal capacitance | $C_i = \text{negligible}$ |
| Max. effective internal inductance | $L_i = \text{negligible}$ |

HART® module:

- For communication with HART® instruments
- Supports a selected set of HART® universal and common practice commands
- Read basic device information and trim the mA output on most HART® enabled transmitters
- No necessity to use DDL specific libraries
- Integrated 250 Ω resistance
- Integrated 24 V voltage supply

HART® communication:

The Pascal 100 offers an optional HART® module with following commands:

- Read unique identifier
- Read current and percentage of range
- Read current and four (predefined) dynamic variables
- Read tag (TAG), descriptor (DD), date
- Read PV sensor information
- Read output information
- Write tag (TAG), descriptor (DD), date
- Enable/disable fixed current mode
- Trim DAC zero
- Trim DAC gain

Resistance thermometer measurement

- One year specifications
- Temperature effect see "Electrical input signal/Resistance"
- Measure current: < 200 µA
- Specification for 4-wire measurements with $I_{\text{meas.}} < 0.2 \text{ mA}$

Case for models Pascal 100 and Pascal 100/IS

Front panel of model Pascal 100/IS

Software

Pascal report software

The Pascal report software allows the configuration in A4 format of the calibration reports and/or certificates according to users standards.

Importing stored reports from the instrument by RS-232 serial interface/USB (with adapter) makes Pascal report the safer software system to support any calibration procedure according to ISO 9000 standards.

PasLog software

The PasLog software allows the download and the management of the logging data from the instrument to the PC. Data can be displayed and print out in a tabular format as well as in a graphical one. The user interface can be customised.

Scope of delivery

- Portable multifunction calibrator model Pascal 100 or Pascal 100/IS
- Operating instructions
- AC adapter
- Pascal report software
- RS-232 interface cable
- RS-232 to USB adapter
- Test-cable set; order no. 241076
- Pneumatic pressure set; order no. 241028 and 241029 (depending on pressure range)
- 3.1 calibration certificate per DIN EN 10204

Option

- ATEX approval:
II 2G Ex ib IIC T4 Gb - T_{amb} : -10 ... +50 °C
- IECEx approval:
Ex ib IIC T4 Gb - T_{amb} : -10 ... +50 °C
- ACCREDIA calibration certificate
- Environmental parameters module
- Liquid trap
- Hydraulic test pumps
- Pneumatic test pumps
- PasLog software
