

## Weighing Electronics

SIWAREX weighing electronics for SIMATIC  
Dosing/filling/bagging and checking scales

### SIWAREX WP251

#### Overview

SIWAREX WP251 is a flexible weighing module for dosing and filling processes. The compact module can be installed seamlessly in the SIMATIC S7-1200 automation system. It can also be used without a SIMATIC CPU in stand-alone mode.

#### Benefits

SIWAREX WP251 offers the following key advantages:

- Uniform design technology and consistent communication in SIMATIC S7-1200
- Uniform configuration with TIA Portal
- Legal-for-trade according to OIML R-76, R-51, R-61 and R-107
- Internal alibi memory for up to 550 000 entries
- Operation without SIMATIC CPU possible
- Ethernet port ex works (Modbus TCP/IP / SIWATOOL)
- RS 485 interface ex works (Modbus RTU / remote display)
- Four digital inputs and outputs, one analog output ex works
- Measurement of weight and force with a high resolution of up to  $\pm 4$  million parts and an accuracy of 0.05%
- Simple adjustment of scale using the SIWATOOL V7 program via the Ethernet interface
- Recovery point for simple restoration of all parameters
- Automatic calibration is possible without the need for calibration weights
- Supports replacement of module without recalibration of scales
- Direct use in hazardous area zone 2

#### Application

SIWAREX WP251 is the optimum solution wherever fast and precise dosing and filling are required. The following are typical SIWAREX WP251 applications:

- Automatic catchweighing instruments (ACI) — legal-for-trade in accordance with OIML R-51
- Automatic gravimetric filling instruments (AGFI) — legal-for-trade in accordance with OIML R-61
- Non-automatic weighing instruments (NAWI) — legal-for-trade in accordance with OIML R-76
- Discontinuous totalizing automatic weighing instruments (DTAWI) — legal-for-trade in accordance with OIML R-107

#### Design

SIWAREX WP251 is a compact technology module in the SIMATIC S7-1200, and communicates directly via the system bus with the SIMATIC S7-1200 controller.

The compact weighing module has a width of 70 mm (2.76 inch) and is installed using a DIN rail. This is extremely user-friendly.

The connections for the power supply, load cells, RS 485 interface, digital inputs/outputs, and the analog outputs are located on removable screw connector blocks. An RJ45 port is available for the Ethernet connection (SIWATOOL and Modbus TCP/IP).

#### Function

SIWAREX WP251 controls dosing and filling processes completely autonomously. The dosing valves (coarse/fine flow) can be controlled directly via the four digital outputs of the module. This achieves maximum accuracy since the weighing process is controlled completely independently of the CPU and its cycle time.

The CPU can be used to manage recipes and material parameters. These parameters and the desired setpoint are then transferred to SIWAREX WP251 by function block, and the dosing process is started. SIWAREX WP251 automatically optimizes the shut-off points, generates statistics, and logs every dosing task in the internal protocol memory that is also accessible from the CPU and can be read out by the CPU.

Diverse options are available for commissioning. The SIWAREX WP251 function block enables full access to all parameters of the SIWAREX WP251. The downloadable example application "ready-for-use" provides full data access to the weighing module, calibration options and operation of the scale - without any additional programming effort. Further, the PC service software SIWATOOL V7 that communicates via Ethernet with the SIWAREX module can be used for commissioning. Access using W-LAN is thus also possible by means of a WIFI access point. Consequently, remote access via the Internet is also no problem. For servicing purposes, centralized access to all scales from a single location is possible – worldwide. In addition, there is full access to all parameters and commands, via both the RS 485 interface (Modbus RTU) and the Ethernet interface (Modbus TCP/IP), meaning that full commissioning and operation can also take place via these channels.

**Function** (continued)**Weighing functions**

SIWAREX WP251 provides the weighing modes NAWI (non-automatic weighing instrument), ACI (automatic catchweighing instrument) and AGFI (automatic gravimetric filling instrument).

In the operating modes NAWI and ACI, there is a choice between filling mode and emptying mode. The entire filling or dosing process is fully controlled from SIWAREX WP251. It is only necessary to transfer a setpoint and a start command to the module. The coarse flow, fine flow and empty signals can be switched directly via the digital outputs of the module.

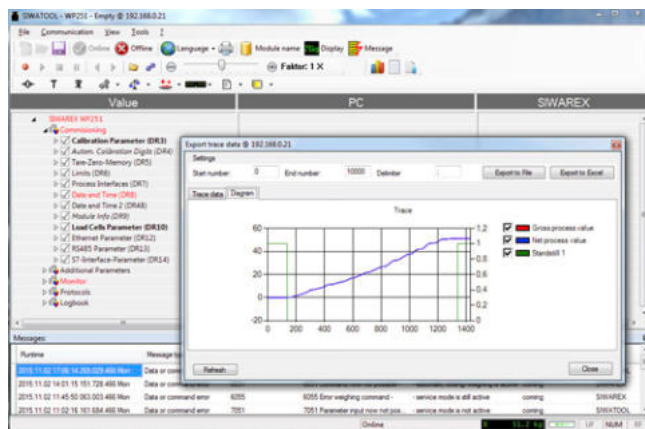

Data regarding the weight, as well as all scale and dosing status bits, are available cyclically in the program code in the PLC for further evaluation. If stand-alone mode of the module is activated, there is an additional guarantee that dosing and operation of the scales can continue even in the event of a CPU stop.

**Software**

SIWATOOL V7 is a special program for commissioning and servicing and runs with Windows operating systems. The program enables the user to perform scale calibration without requiring automation engineering skills. During servicing, the technician can use a PC to analyze and test the procedures in the scale. Reading the diagnostics buffer from SIWAREX WP251 is extremely helpful when analyzing events.

The following are just some of the tasks that can be carried out using SIWATOOL V7:

- Parameter assignment and calibration of the scale
- Testing of scale properties
- Recording and analysis of weighing sequence

Software SIWATOOL V7, layout of the program windows

It is also extremely helpful to analyze the diagnostics buffer which can be saved together with the parameters from the module in a backup file.

Trace mode is provided to optimize the weighing sequences in the SIWAREX WP251 weighing module. The recorded weight values and associated states can be displayed as trends using SIWATOOL V7 and MS Excel.

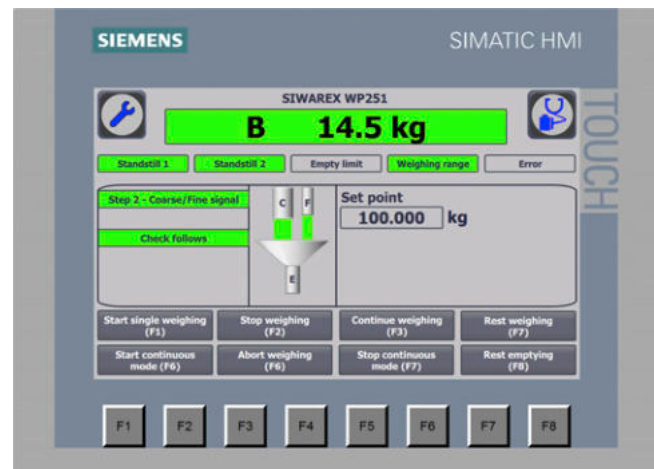

**Upgrading firmware**

An additional program function can be used to download a new firmware version onto the SIWAREX WP251 on site. This means that firmware upgrades can be carried out on site as required anywhere in the world.

**Integration****Integration into the automation environment**

SIWAREX WP251 is part of the SIMATIC S7-1200 Basic Controller range, and is integrated seamlessly into the TIA Portal. The free function block enables full access to all parameters, actual values, setpoints, weight values and status information (e.g. limits, coarse flow signal, fine flow signal, empty signal) conveniently and without programming effort. Customized operator interfaces can thus be created in conjunction with SIMATIC HMI touch panels. Management of several languages can also be easily implemented and organized.

The example project "Ready-for-use SIWAREX WP251" is available free of charge to help you to get started quickly and simply. This TIA Portal project contains both the function block and a fully fledged visualization system for operating and monitoring the SIWAREX WP251. The visualization can be freely edited and adapted, or transferred completely into an existing HMI project.

**Stand-alone mode**

Alternatively, SIWAREX WP251 can also be used without a SIMATIC CPU. In this case, the module is connected with a supply voltage of 24 V DC only. In this case, a PC (using an OPC server, for example) or a Modbus-enabled operator panel can be used for operator input. Both Modbus interfaces of SIWAREX WP251 (TCP/IP and RTU) enable access to all parameters, actual values, setpoints, weight values and status information. A customized and plant-specific operator interface can thus be created on the PC or the Modbus-enabled operator panel. Integration into third-party systems is also no problem via the Modbus interfaces.

#### Technical specifications

SIWAREX WP251	
<b>Weighing modes</b>	<ul style="list-style-type: none"> <li>• Non-automatic weighing instrument (NAWI) (filling + removal) (legal-for-trade in accordance with OIML R-76)</li> <li>• Automatic catchweighing instruments (ACI) (filling + removal) (legal-for-trade in accordance with OIML R-51)</li> <li>• Automatic gravimetric filling instruments (AGFI) (legal-for-trade in accordance with OIML R-61)</li> <li>• Discontinuous totalizing automatic weighing instruments (DTAWI) — legal-for-trade in accordance with OIML R-107</li> </ul>
<b>Integration in automation systems</b>	
S7-1200	SIMATIC S7-1200 system bus
Operator panel and/or automation systems from other vendors	Via Ethernet (Modbus TCP/IP) or RS 485 (Modbus RTU)
<b>Ports</b>	<ul style="list-style-type: none"> <li>• 1 × SIMATIC S7-1200 system bus</li> <li>• 1 × Ethernet (SIWATOOL and Modbus TCP/IP)</li> <li>• 1 × RS 485 (Modbus RTU or remote display)</li> <li>• 1 × analog output (0/4 - 20 mA)</li> <li>• 4 × digital inputs (24 V DC, floating)</li> <li>• 4 × digital outputs (24 V DC, floating, short-circuit proof)</li> </ul>
<b>Functions</b>	<ul style="list-style-type: none"> <li>• 3 limits</li> <li>• Tare</li> <li>• Tare specification</li> <li>• Zeroing</li> <li>• Zero adjustment</li> <li>• Statistics</li> <li>• Automatic correction of the shut-off points</li> <li>• Internal protocol memory for 550 000 entries</li> <li>• Trace function for signal analysis</li> <li>• Internal restore point</li> <li>• Stand-alone mode or SIMATIC S7-1200 integrated</li> </ul>
<b>Parameter assignment</b>	<ul style="list-style-type: none"> <li>• Full access using function block in SIMATIC S7-1200</li> <li>• Full access using Modbus TCP/IP</li> <li>• Full access using Modbus RTU</li> </ul>
<b>Remote display</b>	
Connection	Via RS 485
<b>Scale adjustment</b>	PC software SIWATOOL (Ethernet), S7-1200 function block and touch panel or directly connected operator panel (Modbus)
<b>Measuring accuracy</b>	
Error limit according to DIN 1319-1 of full-scale value at 20 °C ± 10 K (68 °F ± 10 K)	0.05%
Internal resolution	Up to ± 4 million parts
<b>Number of measurements/second</b>	100 or 120 (selectable)
<b>Filter</b>	<ul style="list-style-type: none"> <li>• Low-pass filter 0.1 ... 50 Hz</li> <li>• Average value filter</li> </ul>

SIWAREX WP251	
<b>Load cells</b>	Strain gauges in 4-wire or 6-wire system
<b>Load cell powering</b>	
Supply voltage (regulated via feedback)	4.85 V DC
Permissible load resistance	
• $R_{Lmin}$	> 40 Ω
• $R_{Lmax}$	< 4 100 Ω
With SIWAREX IS Ex interface	
• $R_{Lmin}$	> 50 Ω
• $R_{Lmax}$	< 4 100 Ω
<b>Load cell characteristic</b>	1 ... 4 mV/V
<b>Permissible range of the measurement signal (with 4 mV/V sensors)</b>	-21.3 ... +21.3 mV
<b>Max. distance of load cells</b>	500 m (229.66 ft)
<b>Connection to load cells in Ex zone 1</b>	Optionally via SIWAREX IS Ex interface
<b>Certificates</b>	<ul style="list-style-type: none"> <li>• ATEX Zone 2</li> <li>• UL</li> <li>• KCC</li> <li>• EAC</li> <li>• RCM</li> </ul>
<b>Calibration approvals</b>	<ul style="list-style-type: none"> <li>• EU type-examination certificate 2014/31/EU (NAWI) according to OIML R-76</li> <li>• EU type-examination certificate 2014/32/EU (MID) according to OIML R-61 and OIML R-51</li> <li>• EU type-examination certificate 2014/32/EU (MID) according to OIML R-107</li> </ul>
<b>Auxiliary power supply</b>	
Rated voltage	24 V DC
Max. power consumption	200 mA
Max. power consumption SIMATIC Bus	3 mA
<b>IP degree of protection to DIN EN 60529; IEC 60529</b>	IP20
<b>Climatic requirements</b>	
$T_{min(IND)}$ ... $T_{max(IND)}$ (operating temperature)	
• Vertical installation	-10 ... +40 °C (14 ... 104 °F)
• Horizontal installation	-10 ... +55 °C (14 ... 131 °F)
<b>EMC requirements</b>	According to EN 45501
<b>Dimensions</b>	70 × 75 × 100 mm (2.76 × 2.95 × 3.94 inch)
