

## Counting scale KERN CFS

# Professional, high-resolution counting scale with 100 item memories and second balance interface, counting resolution up to 75,000 points

#### Features

STANDARD

- Memory (PLU) for 100 items with additional text, reference weight and tare weight, e.g. of a container
- Precise counting: The automatic reference weight optimisation of reference weight gradually improves the average piece weight value
- Programmable using numerical key pad:
   required reference quantity
- known reference weight
- Three displays for weight display, reference weight, total pieces
- Weighing with tolerance range (checkweighing): a visual and audible signal helps with portioning, dispensing or grading
- Fill-to-target function Programmable target quantity or target weight. A signal will be displayed when the target value is reached
- PRE-TARE function for manual subtraction of a known container weight, useful for checking fill-levels

• 6553 •

- Second balance interface to construct a high-resolution counting system, standard, e.g. with weighing bridges of KERN KFP V20
- Draught shield standard for models with weighing plate size A, weighing space W×D×H 158×143×64 mm
- Protective working cover included with delivery, for models with weighing plate size
   A, B

#### **Technical data**

- Large backlit LCD displays, digit height 20 mmDimensions weighing surface
  - A Ø 80 mm
- W×D 295×225 mm
- C W×D 370×240 mm
- Overall dimensions W×D×H
- A 315×350×180 mm (incl. draught shield)
- B 315×350×180 mm
- C 375×350×130 mm
- Permissible ambient temperature 0 °C/40 °C

DAkkS

OPTION

E D

# Accessories

- Protective working cover, scope of delivery:
  5 items, for models with weighing plate size
  A, E, KERN CFS-A02S05
- Internal rechargeable battery pack, operating time up to 70 h without backlight, charging time approx. 14 h, KERN GAB-A04
- Signal lamp for visual support of weighing with tolerance range, only in combination with, KERN CFS-A03
- Y-cable for parallel connection of two terminal devices to the RS-232 interface on the scale, e.g. signal lamp and printer, KERN CFS-A04
- Further details, plenty of further accessories and suitable printers see *Accessories*

#### Pictograms

#### Internal adjusting: Quick setting up of the balance's accuracy with

#### Adjusting program CAL:

For quick setting up of the balance's accuracy. External adjusting weight required

internal adjusting weight (motordriven)

Memory:

Easy Touch: Suitable for the connection, data transmission and control through PC, tablet or smartphone.

#### MEMORY

Balance memory capacity, e.g. for article data, weighing data, tare weights, PLU etc.

Alibi memory:

Secure, electronic archiving of weighing results, complying with the 2014/31/EU standard

#### Data interface RS-232: • 6550.•

To connect the balance to a printer, PC or RS 232 network

## **RS-485 data interface:**

To connect the balance to a printer, PC or other peripherals. Suitable for data transfer over large distances. Network in bus topology is possible

### USB data interface:

To connect the balance to a printer, PC or other peripherals

#### Bluetooth\* data interface:

To transfer data from the balance to a printer, PC or other peripherals

\*

#### WiFi data interface:

To transfer data from the balance to a printer, PC or other peripherals

Control outputs (optocoupler, digital I/O): To connect relays, signal lamps, valves, etc.

#### Analogue interface:

to connect a suitable peripheral device for analogue processing of the measurements

#### Interface for second balance:

For direct connection of a second balance

balance calibration.

Range of services:

characteristics) for test weights

· Calibration of force-measuring devices

ment in Europe

## Network interface:

For connecting the scale to an Ethernet network

**KERN – Precision is our business** 

PROTOCOL

#### **KERN Communication Protocol (KCP):** KCP

It is a standardized interface command set for KERN balances and other instruments, which allows retrieving and controlling all relevant parameters and functions of the device. KERN devices featuring KCP are thus easily integrated with computers, industrial controllers and other digital systems

#### GLP/ISO log:

#### GLP/ISO log:

With weight, date and time. Only with KERN PRINTER printers

#### **Piece counting:**

Reference quantities selectable. Display can PCS be switched from piece to weight

#### Recipe level A:

#### Recipe level B:

#### **Totalising level A:**

- 88' The weights of similar items can be added SUM together and the total can be printed out

#### Percentage determination:

Determining the deviation in % from the target value (100 %)

#### Weighing units:

# to KERN's website for more details

#### Weighing with tolerance range:

(Checkweighing) Upper and lower limiting can be programmed individually, e.g. for sorting and dosing. The process is supported by an audible or visual signal, see the relevant model

#### Hold function: ^-

Protection against dust and water splashes IPxx:

The type of protection is shown in the pictogram

To ensure the high precision of your balance KERN offers you the the appropriate test

In combination with a DAkkS calibration certificate the best pre-requisite for proper

The KERN DAkkS calibration laboratory today is one of the most modern and bestequipped DAkkS calibration laboratories for balances, test weights and force-measure-

Thanks to the high level of automation, we can carry out DAkkS calibration of balances, test weights and force-measuring devices 24 hours a day, 7 days a week.

· Volume determination and measuring of magnetic susceptibility (magnetic

· Conformity evaluation and reverification of balances and test weights

· Database supported management of checking equipment and reminder service

· DAkkS calibration certificates in the following languages DE, EN, FR, IT, ES, NL, PL

· DAkkS calibration of balances with a maximum load of up to 50 t · DAkkS calibration of weights in the range of 1 mg - 2500 kg

weight in the international OIML error limit classes E1-M3 from 1 mg - 2500 kg.

#### Suspended weighing: ÷.

Load support with hook on the underside of UNDER the balance

#### **Battery operation:**

Ready for battery operation. The battery type is specified for each device

#### Rechargeable set

#### Universal mains adapter:

with universal input and optional input socket MULTI adapters for A) EU, CH, GB; B) EU, CH, GB, USA; C) EU, CH, GB, USA, AUS Mains adapter:

#### 230V/50Hz in standard version for EU, CH.

On request GB, USA or AUS version available

#### Power supply:

Integrated in balance. 230V/50Hz standard EU. More standards e.g. GB, USA or AUS on request

DMS

#### Weighing principle: Strain gauges:

Electrical resistor on an elastic deforming body

#### Weighing principle: Tuning fork:

A resonating body is electromagnetically excited, causing it to oscillate

#### Weighing principle: Electromagnetic force compensation:

Coil inside a permanent magnet. For the most accurate weighings Weighing principle: Single cell technology:

Advanced version of the force compensation
