The pressure transmitter IMK 351P has been designed for measuring small system pressure in the food industry and chemical industry.

The IMK 351P is based on an own-developed capacitive ceramic sensor element. It features high overpressure resistance and high resistance against most of aggressive media. A variety of different process and electrical connections and an intrinsically safe version complete the range of possibilities.

Preferred areas of use are

Food industry

Chemical and
petrochemical industry

Preferred used for

Paint and varnish

Viscous and pasty media
