

IMP 339

Industrial Pressure Transmitter

Stainless Steel Sensor

accuracy according to IEC 60770: 0.35 % FSO

Nominal pressure

from 0 ... 60 bar to 0 ... 600 bar

Output signals

2-wire: 4 ... 20 mA 3-wire: 0 ... 20 mA / 0 ... 10 V others on request

Special characteristics

- mechanical connection: G 1/4" flush
- suitable for viscous and pasty media

Optional versions

- IS-version
 Ex ia = intrinsically safe for gases and dusts
- several electrical connections
- customer specific versions

The IMP 339 industrial pressure transmitter features a G 1/4" flush pressure port and was designed for the use in a range of machinery including metering systems. It is ideal for measuring the pressure of viscous and pasty media, as only a small dead space is created.

Material accumulation, dripping and stringing in machinery is eliminated. This increases the efficiency and reliability of your machines.

The IMP 339 is available with various electrical connections, ensuring an excellent adaption to the application conditions.

Preferred areas of use are:

Plant and machine engineering - especially conveyor plants and dosing systems

Hydraulics
