# Capsule pressure gauge with switch contacts For the process industry, high overload safety Model 632.51 

WIKA data sheet PV 26.06

## Ex

## Applications

- Control and regulation of processes at measuring points with increased overload and scale ranges from 0 ... 2.5 mbar
- Monitoring of plants and switching of circuits
- For gaseous, aggressive media, also in aggressive environments
- Process industry: Chemical industry, petrochemical industry, power plants, mining, on-/offshore, environmental technology, machine building and general plant construction

## Special features

- High overload safety up to 50 x full scale value
- High reliability and long service life

■ Up to 4 switch contacts per instrument

- Instruments with inductive contacts for use in hazardous areas
- Instruments with switch contact for PLC applications

## Description

Wherever the process pressure has to be indicated locally and, at the same time, circuits need to be switched, the model 632.51 switchGAUGE finds its use.

Switch contacts (electrical alarm contacts) make or break circuits dependent upon the pointer position of the indicating measuring instruments. The switch contacts are adjustable over the full extent of the scale range (see DIN 16085), and are mounted predominantly below the dial, though also partly on top of the dial. The instrument pointer (actual value pointer) moves freely across the entire scale range, independent of the setting.
The set pointer can be adjusted using a removable adjustment key in the window.

Capsule pressure gauge model 632.51.100, with switch contact model 821.12

Switch contacts consisting of several contacts can also be set to a single set point. Contact actuation is made when the actual value pointer travels beyond or below the desired set point.

The pressure measuring instrument is manufactured in accordance with DIN 16085 and fulfils all requirements of the relevant standards (EN 837-3) and regulations for the on-site display of the working pressure of pressure vessels. As switch contacts, magnetic snap-action contacts, reed switches, inductive contacts and electronic contacts are available. Inductive contacts can be used in hazardous areas. For triggering programmable logic controllers (PLC), electronic contacts and reed switches can be used.

## Specifications

| Model 632.51 |  |
| :---: | :---: |
| Nominal size in mm | $\begin{aligned} & \text { ■ } 100 \\ & \text { - } 160 \end{aligned}$ |
| Accuracy class | $1.6^{1)}$ <br> Option: <br> $\square 1.0^{2)}$ $\square$ $0.6^{2)}$ |
| Scale ranges | 0 ... 2.5 mbar to 0 ... 100 mbar other units (e.g. psi, kPa ) available or all other equivalent vacuum or combined pressure and vacuum ranges |
| Scale | Single scale <br> Option: <br> Dual scale |
| Pressure limitation |  |
| Steady | Full scale value |
| Fluctuating | 0.9 x full scale value |
| Overload safety | 50 x full scale value Higher overload safety on request ${ }^{2)}$ |
| Process connection with lower measuring flange | $\begin{aligned} & \text { G } 1 / 2 \text { B } \\ & 1 / 2 \text { NPT } \\ & \text { M } 20 \times 1.5 \\ & \text { others on request } \end{aligned}$ |
| Permissible temperature ${ }^{3)}$ |  |
| Medium | $+100^{\circ} \mathrm{C}\left[+212{ }^{\circ} \mathrm{F}\right]$ maximum |
| Ambient | $-20 \ldots+60^{\circ} \mathrm{C}\left[-4 \ldots 140^{\circ} \mathrm{F}\right.$ ] |
| Temperature effect | When the temperature of the measuring system deviates from the reference temperature $\left(+20^{\circ} \mathrm{C}\right)$ : max. $\pm 0.6 \% / 10 \mathrm{~K}$ of full scale value |
| Case | Version S1 per EN 837: With blow-out device in case back |
| Case filling | Without |
| Zero point setting | By means of adjustment appliance |
| Wetted materials |  |
| Process connection, media chamber, capsule element (pressure element) | Stainless steel 316 Ti |
| Sealing | PTFE |
| Non-wetted materials |  |
| Case, movement, bayonet ring | Stainless steel |
| Dial | Aluminium, white, black lettering |
| Instrument pointer | Aluminium, black |
| Set pointer | Aluminium, red |
| Window | Laminated safety glass |
| Ingress protection per IEC/EN 60529 | IP54 |
| Mounting | Rigid measuring line <br> Option: <br> - Instrument mounting bracket for wall or pipe mounting <br> - Mounting flange |

[^0]Cable socket PA 6, black
Per VDE 0110 insulation group C/250 V
Cable gland M20 x 1.5
Strain relief
6 screw terminals + PE for conductor cross-section $2.5 \mathrm{~mm}^{2}$
For dimensions see page 9 others on request

## Switch contacts

Magnetic snap-action contact model 821
■ No control unit and no supply voltage required

- Direct switching up to 250 V, 1 A
- Up to 2 switch contacts per measuring instrument

## Inductive contact model 831

- Suitable for use in hazardous areas with corresponding control unit (model 904.xx)
- Long service life due to non-contact sensor
- Low influence on the indication accuracy
- Fail-safe switching at high switching frequency
- Insensitive to corrosion
- Also available in safety version
- Up to 3 switch contacts per measuring instrument

## Electronic contact model 830 E

- For direct triggering of a programmable logic controller (PLC)
■ 2-wire system (option: 3-wire system)
- Long service life due to non-contact sensor
- Low influence on the indication accuracy

■ Fail-safe switching at high switching frequency

- Insensitive to corrosion
- Up to 3 switch contacts per measuring instrument

## Other versions

- Contact model 821 with separate circuits
- Contact model 821 as change-over contact (break or make simultaneously at the set point)
- Contact model 821 with cable break monitoring (parallel resistance $47 \mathrm{k} \Omega$ and $100 \mathrm{k} \Omega$ )
- Contact materials for contact model 821: Platinum-iridium alloy and gold-silver alloy

## Reed switch model 851

■ No control unit and no supply voltage required

- Direct switching up to 250 V, 1 A
- For direct triggering of a programmable logic controller (PLC)
- Free from wear as without contact
- NS 100: Up to two change-over contacts per measuring instrument
NS 160: Up to one change-over contact per measuring instrument (switching voltages $\mathrm{AC}<50 \mathrm{~V}$ and $\mathrm{DC}<75 \mathrm{~V}$, switch contact not adjustable from outside)

## Switching function

The switching function of the switch is indicated by index 1 , 2 or 3
Model 8xx.1: Normally open (clockwise pointer motion)
Model 8xx.2: Normally closed (clockwise pointer motion)
Models 821.3 Change-over; one contact breaks and one and 851.3: contact makes simultaneously when pointer reaches set point

For further information on switch contacts, see data sheet AC 08.01

[^1]
## Specifications for instruments with magnetic snap-action contact model 821

| Measuring <br> span ${ }^{1)}$ | Max. number of con- <br> tacts | Switching current <br> range I | Switch version ${ }^{2)}$ |
| :--- | :--- | :--- | :--- |
| $\geq 2.5$ mbar | 2 | $0.02 \ldots 0.3 \mathrm{~A}$ | L |

1) Accuracy class 2.5 for scale range $0 \ldots 2.5$ mbar
2) Design of the contact coil: Version "L" $=$ light-weight

The switch points must be specified in order to maintain the accuracy class.
The recommended setting range of the contacts is $25 \ldots 75 \%$ of the scale ( $0 \ldots 100 \%$ on request).
Contact material (standard): Silver-nickel, gold-plated

## Setting the contacts

The recommended minimum clearance between 2 contacts is $20 \%$ of the measuring span.
The switch hysteresis is $2 \ldots 5 \%$ (typical).

| Characteristics | Unfilled instruments | Filled instruments |
| :--- | :--- | :--- |
|  | Resistive load |  |
| Rated operating voltage U $_{\text {eff }}$ | $\leq 250 \mathrm{~V}$ | $\leq 250 \mathrm{~V}$ |
| Rated operating current |  |  |
| Switch-on current <br> Switch-off current <br> Continuous current | $\leq 0.5 \mathrm{~A}$ | $\leq 0.5 \mathrm{~A}$ |
| Switching power | $\leq 0.5 \mathrm{~A}$ | $\leq 0.5 \mathrm{~A}$ |
|  | $\leq 30 \mathrm{~W} / \leq 50 \mathrm{VA}$ | $\leq 0.3 \mathrm{~A}$ |

Recommended contact load with resistive and inductive loads

| Operating voltage | Unfilled instruments |  |  | Filled instruments |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Resistive load |  | $\begin{array}{\|l\|} \hline \text { Inductive load } \\ \hline \cos \varphi>0.7 \\ \hline \end{array}$ | Resistive load |  | Inductive load |
|  | Direct current | Alternating current |  | Direct current | Alternating current | $\cos \varphi>0.7$ |
| DC $220 \mathrm{~V} / \mathrm{AC} 230 \mathrm{~V}$ | 100 mA | 120 mA | 65 mA | 65 mA | 90 mA | 40 mA |
| DC $110 \mathrm{~V} / \mathrm{AC} 110 \mathrm{~V}$ | 200 mA | 240 mA | 130 mA | 130 mA | 180 mA | 85 mA |
| DC $48 \mathrm{~V} / \mathrm{AC} 48 \mathrm{~V}$ | 300 mA | 450 mA | 200 mA | 190 mA | 330 mA | 130 mA |
| DC $24 \mathrm{~V} / \mathrm{AC} 24 \mathrm{~V}$ | 400 mA | 600 mA | 250 mA | 250 mA | 450 mA | 150 mA |

## Specifications for instruments with inductive contact model 831

| Measuring span ${ }^{1)}$ | Max. number of contacts |
| :--- | :--- |
| $\mathbf{~} \geq 2.5$ mbar | 3 |

The recommended setting range of the contacts is $10 \ldots 90 \%$ of the scale ( $0 \ldots 100 \%$ on request).

## Setting of contacts to identical set point

Up to 2 contacts can be set to an identical set point. For a version with 3 contacts this is not possible. The left (no. 1) or right (no. 3) contact may not be set to the same set point as the other 2 contacts. The required displacement is approx. $30^{\circ}$, optionally to the right or to the left.

## Available contact versions

- 831-N
- 831-SN, safety version ${ }^{1)}$
- 831-S1N, safety version ${ }^{1)}$, inverted signal

1) only operate with a corresponding isolating amplifier (model 904.3x)

Permissible temperature ranges

| T6 6 | $\mathrm{~T} 5 \ldots \mathrm{~T} 1$ | $\mathrm{~T} 135^{\circ} \mathrm{C}$ |
| :--- | :--- | :--- |
| $-20 \ldots+60^{\circ} \mathrm{C}$ | $-20 \ldots+70^{\circ} \mathrm{C}$ | $-20 \ldots+70^{\circ} \mathrm{C}$ |

For further information on hazardous areas, see operating instructions.

Associated isolating amplifiers and control units

| Model | Version | Ex version |
| :--- | :--- | :--- |
| 904.28 KFA6 - SR2 - Ex1.W | 1 contact | yes |
| 904.29 KFA6 - SR2 - Ex2.W | 2 contacts | yes |
| 904.30 KHA6 - SH - Ex1 | 1 contact | yes - safety equipment |
| 904.33 KFD2 - SH - Ex1 | 1 contact | yes - safety equipment |
| 904.25 MSR 010-I | 1 contact | no |
| 904.26 MSR 020-I | 2 contacts | no |
| 904.27 MSR 011-I | Two-point control | no |

## Specifications for instruments with electronic contact model 830 E

| Measuring span | Max. number of contacts |
| :--- | :--- |
| $\geq \mathbf{2 . 5}$ mbar | 3 |

The recommended setting range of the contacts is $10 \ldots 90 \%$ of the scale ( $0 \ldots 100 \%$ on request).

## Setting of contacts to identical set point

Up to 2 contacts can be set to an identical set point. For a version with 3 contacts this is not possible. The left (no. 1) or right (no. 3) contact may not be set to the same set point as the other 2 contacts. The required displacement is approx. $30^{\circ}$, optionally to the right or to the left.

| Characteristics | Normally open, normally closed |
| :--- | :--- |
| Contact version | PNP transistor |
| Type of output | DC $10 \ldots 30 \mathrm{~V}$ |
| Operating voltage | max. $10 \%$ |
| Residual ripple | $\leq 10 \mathrm{~mA}$ |
| No-load current | $\leq 100 \mathrm{~mA}$ |
| Switching current | $\leq 100 \mathrm{HA}$ |
| Residual current | $\leq 0.7 \mathrm{~V}$ |
| Voltage drop (with Imax.) | Conditional $\mathrm{U}_{\mathrm{B}}$ (the switched output 3 or 4 must never be set directly to minus) |
| Reverse polarity protection | $1 \mathrm{kV}, 0.1 \mathrm{~ms}, 1 \mathrm{k} \Omega$ |
| Anti-inductive protection | approx. $1,000 \mathrm{kHz}$ |
| Oscillator frequency | per EN $60947-5-2$ |
| EMC |  |

## 2-wire system (standard)

3-wire system

## Specifications for instruments with reed switch model 851

| Measuring span ${ }^{1)}$ | Max. number of contacts |
| :---: | :---: |
| $\geq 2.5$ mbar 2 | 2 |
| 1) Accuracy class 2.5 for scale range $0 \ldots 2.5 \mathrm{mbar}$ |  |
| Switching power $\mathrm{P}_{\max } 60 \mathrm{~W} / 60 \mathrm{VA}$ |  |
| Characteristics |  |
| Contact version | Change-over contact |
| Type of contact | Bistable |
| Max. switching voltage | AC/DC 250 V |
| Min. switching voltage | Not required |
| Switching current | AC/DC 1 A |
| Min. switching current | Not required |
| Transport current | AC/DC 2 A |
| $\cos \varphi$ | 1 |
| Switching power | 60 W/VA |
| Contact resistance (static) | $100 \mathrm{~m} \Omega$ |
| Insulation resistance | $10^{9} \Omega$ |
| Breakdown voltage | DC 1,000 V |
| Switching time incl. contact chatter | ter $\quad 4.5 \mathrm{~ms}$ |
| Contact material | Rhodium |
| Switch hysteresis | $3 . . .5$ \% |

- The limit values presented here must not be exceeded.
- When using two contacts, these cannot be set to the same point. Depending on the switching function, a minimum clearance of $15 \ldots 30^{\circ}$ is required.
- The setting range of the contacts is $10 \ldots 90 \%$ of the scale.
- The switching function can be set in manufacturing such that the reed contact will actuate exactly at the required switch point. For this, we need the switching direction to be specified on order.

## Approvals

The specifications given in this document represent the state of engineering at the time of publishing.
We reserve the right to make modifications to the specifications and materials.

[^0]:    1) Accuracy class 2.5 for scale range $0 \ldots 2.5$ mbar
    2) Application test required
    3) For hazardous areas, the permissible temperature of the contact model 831 will exclusively apply (see page 5). These must not be exceeded at the instrument either (for details see operating instructions). If necessary, measures for cooling (e.g. syphon, instrumentation valve, etc.) have to be taken.
[^1]:    - Contacts fixed, without contact adjustment lock
    - Contact adjustment lock leaded
    - Contact adjustment key fixed
    - Connector (instead of cable socket)
