

# Diaphragm seal with threaded connection

## Welded design

### Model 990.34

WIKA data sheet DS 99.04

for further approvals  
see page 6

#### Applications

- Aggressive, hot, corrosive, environmentally hazardous or toxic media
- Oil and gas industry, chemical and petrochemical industries
- Water treatment
- Versatile in application

#### Special features

- Process connection with thread
- Version with internal diaphragm, diaphragm seal parts fully welded
- Large selection of process connections and materials
- Flushing connections optionally available
- High pressures up to 1,000 bar [14,500 psi] can be achieved

**Diaphragm seal with threaded connection, model 990.34**

#### Description

Diaphragm seals are used for the protection of pressure measuring instruments in applications with difficult media. In diaphragm seal systems, the diaphragm of the diaphragm seal effects the separation of the instrument and the medium. The pressure is transmitted to the measuring instrument via the pressure transmission medium which is inside the diaphragm seal system.

For the implementation of demanding customer applications, there is a wide variety of designs, materials and pressure transmission mediums available.

For further technical information on diaphragm seals and diaphragm seal systems see IN 00.06 "Application, operating principle, designs".

The diaphragm seal with threaded connection, model 990.34, is suitable for very versatile application areas. Depending on the material, the welded design can also be used for particularly high nominal pressures up to 1,000 bar [14,500 psi]. Another benefit of the welded joint is that no additional sealing between the upper and lower body of the diaphragm seal is needed.

Mounting of the diaphragm seal to the measuring instrument may be made via a direct connection, for high temperatures via a cooling element or via a flexible capillary.

For the material selection, WIKA offers a variety of solutions, in which the diaphragm seal can be made of different materials.

## Specifications

Model 990.34	
<b>Pressure range</b> (see pressure-temperature diagrams from page 4)	0 ... 0.6 bar [0 ... 8.7 psi] to 0 ... 1,000 bar [0 ... 14,500 psi] other units (e.g. psi, kPa) as well as all equivalent vacuum or combined pressure and vacuum ranges are available.
<b>Level of cleanliness of wetted parts</b>	<ul style="list-style-type: none"> <li>■ Oil and grease free per ASTM G93-03 level F WIKA standard (&lt; 1,000 mg/m<sup>2</sup>)</li> <li>■ Oil and grease free per ASTM G93-03 level D and ISO 15001 (&lt; 220 mg/m<sup>2</sup>)</li> </ul>

Other process connections on request

### Permissible nominal pressure (PN)

The permissible nominal pressure (PN) of the diaphragm seal system results from the selected material and depends on the effective diaphragm diameter of the diaphragm seal (see table below). In addition, the permissible pressure/temperature rating must be taken into account. For the relevant pressure-temperature diagrams, see page 4 and 5.

The maximum permissible process temperature of the diaphragm seal system is also limited by the joining method, by the system fill fluid and by the measuring instrument.

Material of upper body of diaphragm seal and wetted parts <sup>1)</sup>	Nominal pressure (PN) in bar for effective diameter of diaphragm Mb in mm			
	PN 160	PN 400	PN 600	PN 1000
Stainless steel 1.4404 (316L)	Mb 52	Mb 40, Mb 29	Mb 22	
Stainless steel 1.4571 (316Ti)	Mb 52	Mb 40, Mb 29		
Stainless steel 1.4539 (904L)	Mb 52			
Stainless steel 1.4541 (321)	Mb 52			
Duplex 2205 (1.4462)	Mb 52	Mb 40	Mb 29	
Superduplex 2507 (1.4410)	Mb 52			
Hastelloy C22 (2.4602)	Mb 52		Mb 29	
Hastelloy C276 (2.4819)	Mb 52	Mb 40, Mb 29		Mb 22
Inconel 625 (2.4856)	Mb 52	Mb 40	Mb 29	Mb 22
Incoloy 825 (2.4558)	Mb 52	Mb 40, Mb 29	Mb 22	
Monel 400 (2.4360) <sup>2)</sup>	Mb 40, Mb 29			
Titanium grade 2 (3.7035)	Mb 52	Mb 29		

1) Wetted parts: Lower body of diaphragm seal and diaphragms

2) With Mb 52, max. PN 100 possible

These versions require an application test

The effective diameter of diaphragm depends on the selected diaphragm seal system (e.g. mounting type, measuring instrument, scale range)

## Approvals

Logo	Description	Country
	<b>EAC (option)</b> Pressure equipment directive	Eurasian Economic Community
-	<b>MTSCHS (option)</b> Permission for commissioning	Kazakhstan
-	<b>CRN</b> Safety (e.g. electr. safety, overpressure, ...)	Canada

## Certificates (option)

- 2.2 test report per EN 10204 (e.g. state-of-the-art manufacturing, material proof, indication accuracy for diaphragm seal systems)
- 3.1 inspection certificate per EN 10204 (e.g. material proof for wetted metal parts, indication accuracy for diaphragm seal systems)

Approvals and certificates, see website
