

IFO 510 - Industrial oil moisture sensor

IFO 510 for moisture measurement in technical oils

Special advantages:

- Fast response time
- Highly accurate measurement of water activity (a_w), as well as process temperature. Measurement is independent of the respective oil type or age
- Calculation of the absolute water content (PPM), possible for transformer oil
- Two configurable analogue outputs, as well as Modbus-RTU (RS 485) interface available

Typical application, measurement of residual moisture in:

- Transformer oil
- Engine oil
- Lubricating oil
- Hydraulic oil
- Diesel fuels
