

# Druck is back in low pressure

Combining Druck's PV624 with the new PM620LP 'ultra-low' pressure module creates a calibrator that can automatically generate and control ultra-low pressure

- Automatic pressure generation and control up to 55 mbar (22 inH<sub>2</sub>O)
- Hybrid pressure generation up to 20 bar (300 psi)
- One calibrator with a range of pressure modules from  $\pm 2.5$  mbar (1 inH<sub>2</sub>O) FS to 20 bar (300 psi) FS
