

# DPI610E-Aero Optimum precision + accuracy

Druck's new **DPI610E-Aero** is a low cost, flexible portable device for precision leak testing of aircraft pitot static systems.

[Druck.com/DPI610E-Aero](http://Druck.com/DPI610E-Aero)

## Key applications include:

- ▶ **Portable leak tester following ADC change-out.**
- ▶ **Drone and eVTOL leak tester.**
- ▶ **On-stand testing for aircraft.**
- ▶ **Fault test checking.**

Building on the reliable **DPI610-Aero**, the improved **DPI610E-Aero** boasts a refreshed user interface with a high resolution, back lit display, a rugged design and utilises the latest pressure sensing technology.

Configured as a single channel unit for testing either altitude or airspeed parameters, the **DPI610E-Aero** is fully self-contained with manual pressure generation and venting facilities.
