

Battery-powered signal converter For electromagnetic flow meters Model FLC-406

WIKA data sheet FL 20.08

Applications

- Water and wastewater
- Water treatment and distribution
- Leakage detection systems
- Applications without access to the power supply network
- Water revenue and bulk metering

Special features

- Approved for custody transfer (MID MI-001, OIML R49)
- Available as a compact or separated version
- Battery-powered (standard), DC 12 ... 24 V (optional)
- Module for pressure and temperature readout available

Signal converter, model FLC-406

Description

The model FLC-406 is a battery-powered signal converter which is perfectly suited for applications without access to mains supply. A battery life of up to 10 years enables maintenance-free and economical operation.

The model FLC-406 can be combined with all electromagnetic flow meters from WIKA. With the model FLC-2300 flow meters, even low flow velocities from 0.015 m/s can be measured without problems.

The integrated EEPROM memory ("electrically erasable programmable read-only memory") ensures high data security. Up to 100,000 data sets can be saved.

With the supplied software, the model FLC-406 can communicate via IrCOM or Modbus RS-485 interface with a PC, laptop or mobile device to program the signal converter and to manage and download measured values. A multi-level password system guarantees data access for authorised users only.

Specifications

Specifications	
Outputs	■ 2 pulse outputs (MOS), galvanically isolated ■ 4 ... 20 mA, loop-powered (option)
Voltage supply	■ Battery-powered, 2 x 3.6 V lithium battery ¹⁾ ■ DC 12 ... 24 V (optional)
Battery	Lithium-ion battery
Battery life	Up to 10 years
Accuracy	■ 0.2 % of the flow rate ± 2 mm/s ■ 2 % of the flow rate ± 2 mm/s (for insertion flow meter versions)
Cable entry	■ 4 x PG9 gland ■ 2 x cable gland M20 x 1.5, junction box (for separated version)
Communication	IrCOM interface
Temperature ranges	
Medium	-25 ... +80 °C [-13 ... +176 °F]
Ambient	-20 ... +60 °C [-4 ... +140 °F]
Storage	-40 ... +70 °C [-22 ... +158 °F]
Body Materials	■ Case from technopolymer, with aluminium base in the compact version ■ Wall bracket from galvanised carbon steel for the separated version
Flow velocity	0.015 m/s ... 10 m/s
Sampling rate	■ Standard: 1/60 Hz ... 1/5 Hz (default: 1/15 Hz) ■ Max.: 3.125 Hz
Digital filters	■ Dampening ■ Switch-off at low flow velocity (standard: 0.05 m/s) ■ Bypass filter ■ Peak value filter
Ingress protection per EN 60529	IP68 (continuous immersion to 1.5 m) for back mount compact version
Custody transfer	Approved for custody transfer (MID MI-001, OIML R49)

1) Lithium batteries are subject to special transport regulations in accordance with the United Nations recommendations on the transport of dangerous goods, UN 3090 and UN 3091. Special transport documentation is required to comply with these regulations. This can affect both the time and cost of transport.

Instrument construction	
Integration	■ Compact version ■ Separated version, with factory-fitted cable in 5 ... 30 m [16.4 ... 98.4 ft]
LC display	8 digits and 5 decimal places with overflow counter
Displayed information	■ Actual flow ■ Positive totaliser T+ (total) ■ Negative totaliser T- (total) ■ Positive totaliser P+ (partial) ■ Negative totaliser P- (partial) ■ Net totaliser (NET) ■ Date and time ■ Signal converter temperature ■ Process pressure and temperature (optional)
Keys	4 keys
Flow totalisers	5 (2 positive, 2 negative, 1 net flow)
Additional modules	■ GSM/GPRS module ■ Pressure readout module ■ Temperature readout module ■ Energy metering

Software		
Software functions	■ Commissioning ■ Data printout ■ Data export (CSV files) ■ Firmware update ■ Read the flow rate ■ Read and write all non-volatile parameters ■ Download the internal data logger ■ Displaying the event logger	
Selectable flow units	■ m ■ m³ ■ l	■ ml ■ ft³ ■ gal
Display of date and time	Yes	
Process data memory	Storage frequency between 1 ... 120 minutes (standard: 15 minutes), max. 100,000 data sets	
Alarms and status display	Status indication on the display, alarms are recorded in the data logger	
Possible alarms	■ Excitation failure ■ Empty-pipe alarm on the 4th electrode ■ Empty-pipe alarm on the measuring electrode ■ Temperature too high ■ Battery level ■ Pulse overlapped ■ Wet PCB	
Data protection	■ Password protection available ■ Automatic firmware check and recovery during updates	
External test	Field test instrument available for verification of calibrations and for checking the electronics	

Dimensions in mm

Radial mount version

Back mount version

Separated version

Approvals

Logo	Description	Country
CE	EU declaration of conformity	European Union
	EMC directive	
	EN 61326 emission (group 1, class B) and immunity (industrial application)	
	Low voltage directive	
	Custody transfer	
-	International organisation of legal metrology (OIML)	International
-	Measuring instrument directive (MID)	European Union
